Electrical World

A Review of Current Progress in Electricity
and Its Practical Applications

Volume LXXVI

July 3 to December 25, 1920

McGRAW-HILL COMPANY, INC.
Tenth Avenue and Thirty-sixth Street
NEW YORK CITY

INDEX TO VOLUME LXXVI

July—December, 1920

GENERAL INDEX

Entries from the Digest of Current Electrical Literature are indicated by D (Digest)

PAGES BY WEEKS

July	3	1 to	52
July	10	53 to	108
July	17	109 to	156
July	24	157 to	218
July	31	221 to	268
Aug.	7	269 to	316
Aug.	14	317 to	364
Aug.	21	365 to	412
Aug.	28	413 to	460
Sept.	4	461 to	508
Sept.	11	509 to	556
Sept.	18	557 to	604
Sept.	25	605 to	663
Oct.	2	669 to	716
Oct.	9	717 to	764
Oct.	16	765 to	812
Oct.	23	813 to	860
Oct.	30	861 to	908
Nov.	6	909 to	956
Nov.	13	957 to	1004
Nov.	20	1005 to	1052
Nov.	27	1053 to	1100
Dec.	4	1101 to	1148
Dec.	11	1149 to	1196
Dec.	18	1197 to	1244
Dec.	25	1245 to	1292

A

Accident prevention:
——California planning new in its utilization of Safety Orders, 1275.
——Conservation of human lives (comment), 765.
——Danger sign, a universal, *930.
——Defective lighting said to cause annual accident loss of $300,000,000, p. 894.
——Electrical causes, accidents due to, show marked decrease, 983.
——Fire and safety codes, Berresford declares combination impracticable, 700.
——"Foolproof" electrical apparatus (comment), 269.
——"Illumination and Safety" to be discussed at joint meetings, 798.
——Light and safety. By A. B. Oday (D), 344.
——Line construction, safety considerations in, *835.
——Line protective apparatus, high voltage. Bush Electric Co., *47.
——"No accident week," public utilities promote sucessful, 91
——Testing of small transformers, safety-first. By A. Heckma (D), 391.
Accounting:
——Better methods necessary, 742.
——Classification, gas and electric interests get together on, 91.
——Classifications, agreement reached on standard, 650.
——Construction, applying, *868, comment 958.
——Engineering scrutiny of accounts (comment), 365.
——Utility construction, *574, comment 558.
——Uniform system for utilities, draft approved, 1037.
——Virginia utilities to have uniform system, 1278.
Acheson, Edward Goodrich, *160.
Air cleaning by the Cottrell electrical precipitation processes. By P. E. Landolt and H. M. Pier (D), 295.
Air compressors: machinery blowing outfit. Black & Decker Mfg. Co., 1001.
Alaska, water powers, ask $40,000 to investigate, 92.
Alternating-current circuits and apparatus, the protection of. By E. T. Norris (D), 135.
Alternating-current network protector. By H. C. Stewart (D), *32.
Alternating-current propagation—on the effect of a variation in one of the line constants. By Pomey (D) 1178.
Alternating-current systems, automatic protective devices for. By A. E. McCall (D), 86.
Alternator, 1 750-kva. slow-speed (D), 1126.
Aluminum contacts, resistance and constancy of. By R. Richter (D), 888.
Aluminum, telegraph and telephone plants, use in. By U. Meyer (D), 345.
American Bureau of Welding, proposed reorganization, 895.
American Engineering Standards Committee, new officers, 1230.
American Institute of Electrical Engineers:
——Ampere Centennial, meeting to commemorate, 542.
——Atlanta section, hydro-electric power survey to be made by, 939.
——Celebrates discoveries of Ampere, Arago, Davy and Oersted, 797.
——Chicago meeting, lightning protection to be discussed at, 893.
——Committee appointments by President Berresford, 397.
——Convention, annual, 1920, at White Sulphur Springs, *37, technical sessions, 57; electrical machinery session, 58; excitation systems session, 60; protective devices section, 62; electric welding session 64; power factor session, 65.
——Convention, annual, 1921. West wants, at Salt Lake City, 591; Salt Lake City to be meeting place, 796; Social activities to be emphasized, 1084.
——Edison Medal committee, new, 445.
——Forty degree-fifty degree motor investigation to be sponsored by, 1227.
——Geographic division of, arousing interest, 491.
——Lighting protection discussed by, 1040.
——Pacific Coast convention discusses insulators, 204.
——Pacific, railroad electrification and hogged fuel discussed by 254.
——Technical committee reports, 19.
American Society of Mechanical Engineers:
——Centralized control of power districts discussed by, 1227.
——Coal conservation plans crystallizing, 1182.
——Convention, annual 894 1182
——Fortieth anniversary, celebrates, 943.
——Valuation, to discuss, 444.
Ampere, Andre Marie: Centennary *570, *736, comment 559; Crocker-Wheeler Company's celebration 1039, *1183; Electricity, too, has its Columbuses. By W. C. F., 1170.
Antenna. (See Radio.)
Appliance market, eastern jobbers discuss conditions in, 702.
Argentina: Buenos Aires, special lighting during national holiday at, despite high fuel cost, *728.
Armature (See Motors and Motor Repairs).
Arnold, Bion Joseph, *864.
Associated Manufacturers of Electrical Supplies:
——Fall meetings announced, 699, schedules, 796.
——Section chairman, elect new, 203.
——Standards, meet to further, 35.
Association of Edison Illuminating Companies, convention Sept. 13-16 at New London, 349
Association of Edison Illuminating Companies convention, 589.
Association of Iron and Steel Electrical Engineers:
——Convention, plans complete, 492; report, *653.
——Program, adopt tentative, 300.
Audion oscillator. By R. A. Heising (D), 1225.
Austria, water-power development in, 233.
Auto-transformers for motor starting. By V. S. Foster, 977.

B

Babbitts, physical characteristics of, 724.
Baking, core, experience with electric. By Alan D. Dauch, *168, comment 158.
Batteries:
——Clark standard cell, two common failures of the. By E. C. McKelvy and M. P. Shoemaker (D), 985.
——Depolarisant, oxygen from the air as a. By Fery (D), 745.
——Standardization of electrical, 612.
Belgium:
——Electric systems, proposed reorganization, 475.
——Rebuilding France and, electrically. By Oliver Field Allen, *1208, comment, 1197.
Boiler room:
——Ashes sluicing, shows low cost. By Alex. W. Morgan, *16.
——Boiler units and combustion chambers larger, increase economy, 979.
——Clinker grinders facilitate operation 882.
——CO_2 recorder dependability of the. By W Elsworth Lawson, 880.
——Coal and oil fuel costs of, compared by chart. By F. H. Daniels, *739.
Boiler room (Continued):
——Coal ash, test of fusing point of. By Wayne Edwards, 189.
——Coal bunkers, waterproofing overhead. By C. S. Lloyd, 77.
——Coal consumption for different grate spads. By Fred M. Richards, 22.
——Colloidal fuel, advantage of 930.
——Combustion engineers increase plant economy 20 per cent. By E. H. Tenney, 577.
——Condensers, cleanings, saves one fireman on two 3,000-kw. turbines. By A. L. Platt, 738.
——Economizers save seven per cent of total heat, 690.
——Feed heating for land power station. By K. Baumann (D), 840.
——Fuel-oil installation, a. By H. A. Wilcox (D), 439
——Furnace conditions, opportunity to improve (comment), 1054.
——Lignite containing 23 per cent moisture develops 275 per cent boiler rating, *479.
——Maintenance and operation, seventeen rules for efficient boiler-plant. By E. H. Tenny, 639.
——Oil atomizer, mechanical efficient at 320 per cent boiler ratings. By Dorrah Corbet, 786.
——Oil-burning furnace. Babcock & Wilcox. By A. G. Pratt, 689.
——Pulverized coal versus stoker firing. By S. N. Clark, 1265.
——Steam-flow calculations, chart facilitates, *76.
——Stoker trouble eliminated by using spring to lift counterbalance. By Kenneth Walz, *785.
——Superheater losses, saving of. By Norman G. Hardy, 385.
Boilers:
——Arches remodeling ignition. By T. A. Marsh, *823.
——Boiler plants, factors in the design of large. By J. Grady Rollow (D) Part I, 696.
——Mercury, the Emmet (D), 696.
——Ratings effect of boiler, on furnace maintenance. By Theodore Maynz, *1210, comment 1246.
——Steam pressures and superheat. By R. M. Osterman, 21.
——Stoker furnace for coal or oil (D) 438.
——Waters for, preparing Pittsburgh district (D), 536.
Bonding in special locations. By G. H. McKelway (D), 584.
Book reviews:
——Armature winding and motor repair. By D. H. Braymer, 889.
——Oscillations and electric waves, electric. By Prof. G. W. Pierce, 87.
——Radio telegraphy and telephony, Robison's manual of. By Capt. S S Robison 87
——Service at cost plants. By Harlow C. Clark, 87
——Winning the public. By S. M. Kennedy, 745.
Boston Edison Company reduces rates and increases wages, 36.
Brazil, storage-battery bases used by Brazilian tramways 624.
Brooklyn Edison officials explain alleged irregularities in coal orders, 747, comment 717, freed from coal-hoarding charge, 987, not guilty of Lever Act violation, 1276.
Brush, Charles Francis, *112.
Brushes:
——Carbon and commutation wear. By R. E. Hellmund (D), 294.
——Carbon, stocks of, in good supply, 101.
——Carbon, testing. By John S. Dean, *369, comment 366.
Buck, Harold Winthrop, *1248.
Bureau of Standards. (See also National Electrical Safety Code.)
——Lead-covered-cable failures, investigating, 142.
——Utility investigation, wants more money for, 1184.
Bushing:
——Transformer. General Electric Co., *408.
——Wire, economy in electric baking of steel, *193.
Business. (See also Trade Conditions.)
——Beware of the pessimist (comment), 1101.
——Cheerfulness as an antidote to depression (comment), 1245.
——Industrial outlook. A. W. Douglas on, 799
——Moral obliquity in (comment), 957.
——Return to normal the (comment), 221.
——Revival ahead, Dwight P. Robinson sees; 1129.
Byllesby, Henry Marion, *224; says electric light and power outlook is good, 1181.
Byllesby, H. M. & Co.; customer-owners of, properties exceed 24,000, 645.

*Indicates illustrated articles

C

Cables:
——Construction, modern tendencies in (comment), 462.
——High-tension, losses in. By Rennesson (D), 344.
——Lead-covered current-carrying capacity of. By Ralph W. Atkinson (D), 936.
——Lead-covered single-conductor, characteristics of. By Capdeville (D), 984.
——Lead-covered single-phase. By Capdeville (D), 1224.
——Manufacture, recent tendencies in. By H. Savage (D), 583.
——Power, locating faults in. By K. de Koning (D), 295.
——Stresses in high-voltage electric, allowable working. By L. W. Davis and D. M. Simons (D), 248.
——Submarine, is dried out and replaced, *1012.
——Transmission, alternating currents for submarine cable (comment), 814.
——Underground, locating faults on. By W. R. Bullard, *1057, comment 1055.
California:
——Commission links state's prosperity with hydro-electricity, 893.
——Codes, unification of, in, 491.
——Contractors continue "more outlets" campaign, 844.
——Co-operative campaign:
Electrical home campaign, results of, *789.
Electrical homes, continues, 935.
Electrical home idea promotes electric service in, *437, comment, 413.
Emphasizes one thing each month, 1276.
Lighting exhibits, plans, 444.
Ohio, to be tried in, 203.
——Industrial load in, *428, comment 415.
——Power administrator curtails lighting to save power, 489.
——Power for, heavy October snows, assure next year's, 894.
——Power restrictions extended, 747.
——Power shortage now being felt, anticipated, 444.
——Rain comes and restrictions go in, 845.
——Safety codes electrical interests combine to discuss, 795.
——Safety orders, planning new rules in its utilization, 1275.
Canada:
——British Columbia power interests consolidated, 1280.
——Co-operative movement in British Columbia, 491.
——Co-operative plan launched at Vancouver, B. C., 799.
——Co-operative campaigns launched at Winnipeg and Montreal, 843.
——Electrical apparatus, turns out $30,000,000 of, 708.
——Heating, electric, declared impracticable by authority, 927.
——Licenses to export power, Dominion government reduces amount of, 989.
——Niagara power project, design of new (D), 1031.
——Ontario government rejects proposal of Toronto company, 988.
——Ontario Hydro-Electric Commission awards $2,000,000 worth of contracts, 1231.
——Ontario Hydro-Electric Commission favors St. Lawrence plan 895
——Ontario Hydro-Electric Commission seeks to buy MacKenzie interests, 1040.
——Ontario Hydro Commission will not build auxiliary steam plant, 399.
——Ontario hydro-electric world's largest system, purchase of MacKenzie interests makes, *1184.
——Ontario, power situation in, relieved, 1039.
——Power exports prohibited because of situation in Ontario, 893.
——Radio interests merger of Canadian General Electric and Marconi, 703.
——Toronto Hydro-Electric System increases rates, *485.
——Toronto power situation cleaned up, 1231.
——Water power. By James White, 337.
——Water-power development, *229.
Canal haulage, pioneer electrical. By Thomas Commerford Martin, 977.
Carle Nathaniel Allen, *608.
Carty, John Joseph, *1008.
Central stations. (See also Hydro-electric developments and Transmission systems.)
——Adirondack Power & Light Corporation, 252.
——Cape Cod properties consolidated, 399.
——Census of central stations, 1917, U. S., *476, comment 463.
——Central Maine Power acquires smaller properties, 92.
——Consumers' Power Co. starts record frequency changer, *800.
——Consumers' Power system, final steps being taken in unifying 140-kw., 202.
——Duquesne Light Company's Calfox plant added to Pittsburg power supply, 1278.
——Expansion in 1920, 518.
——Idaho Power Company to make extension, 298.
——Kansas City Company to build new substations as measure of economy 255.
——Kerckhoff station, starting of, breaks three-year power famine, 399.
——Milwaukee Electric Railway & Light Company's new plant will relieve power shortage about Dec. 1, p. 800.
——Niagara Falls Power Co., extension to Station No. 3; *561, *678, *779, *825, *875, *961, comments, 767, 815.
Central Stations (Continued):
——Northern Ohio Traction & Light Company may build 120,000-kw. plant to satisfy industrial demand, 1035.
——Northwest system, electrical storm causes great damage to, 206.
——Pacific Power & Light Company's new station, *544.
——Paper manufacturers purchase interest in utility company, 1232.
——Pennsylvania-Ohio Company segregates railway and power property, 1088.
——St. Louis, additional capacity installed at, 301.
——San Joaquin Light & Power Co., additional plant capacity rushed by, 494.
——Southern California Edison Company's forty-million dollar construction plans, 847.
——Southern Power Co., 1252; will build new 60,000-kw. hydro-electric plant, 942.
——Toledo Railways & Light Company, new million dollar power line for, 205.
——Washington Water Power Co. expanding, 1230.
——West Penn Power Co., Springdale plant; first 25,000-kva. unit started, 205; by G. G. Bell, I*625, II*733, comment 605; by George S. Humphrey, I*1114, II*1165, comment 1103.
Central station business and sales management:
——Advertising important to central-station merchandising policies 1124.
——Advertising, making billboard, realistic, *934.
——Appliance campaign, two-month electric, in New York City, *197.
——Appliance tests, portable meter rack for, *133.
——Billing, quarterly, of residential customers proves economical, 246.
——Bills, light, used to advertise civic enterprises, *885.
——Boston company's new business exceeds last year's record, 645.
——Cape Cod, central-station office on tip of, *1079.
——Central-station and oil-engine power, comparative costs of, 483.
——Central station places its credit at disposal of dealers, *29.
——Central-station power, increased use of, by Baltimore industries, *535.
——"Commercializing" a terminal house, *30.
——Competitive supply of electrical energy (comment), 1005.
——Cost per customer served, data on, 247.
——Credit deposits and the rate of interest thereon. By "Kassandra," 533.
——Customer, keeping the, informed, *390.
——Denver company plans another record vacuum-cleaner campaign, 484.
——Denver company sells $40,000 worth of washing machines in thirty days, 581.
——Deposits, refund of customers', 293.
——Earnings, estimating utility, from graphic records, *886.
——Educating consumers to best use of central-station service, 645.
——Electric dollar has increased in value, how the, *533.
——Holyoke municipal plant adds lighting service charge, 39.
——House wiring records, Providence company establishes, 84.
——Income per kilowatt, central station. By "Kassandra," 1176.
——Industrial loads segregate (comment), 413.
——Inspection department is important factor in good service. By C. B. Merrick, *293.
——Kitchen and laundry, model electric, for demonstrating appliances, *247.
——Lamps, time saved in selling, *695.
——Ledger accounts, advantages of simplifying, 82.
——Lighting equipment, utility maintains customers', 743.
——Lighting, industrial, offers increased revenue for central stations, 343.
——Load factor, high, results from long-hour business, *743.
——Merchandising as a public policy asset, 33.
——Merchandising department profitable, New Orleans company makes 886.
——Merchandising expenses, proper, shown by classification of accounts, 246.
——Merchandising policy should fill load-curve valleys, 1030.
——Merchandising, Wilmington company discontinues, 390.
——Meters, advantages in use of glass-covered, 1125.
——Motor displays, composition platform for, *582.
——Motors, posting current prices of. By H D. Stokes, *29.
——Northwest utility sells $1,000,000 issue locally in eleven days, 838.
——Off-peak business to be most sought for this year, 544
——Oil fields, electric power in the, as a central station load. By W. G. Taylor (D), 792.
——Ovens, electric bake, a desirable central-station load. By George W. Cole, *1078.
——Pacific Gas & Electric's record increase of customers, 1079.
——Power-factor penalty applied to kilowatt-hours consumed, 343.
——Power loads, measured demands of, found most satisfactory, *1176.
——Power "prospect" form saves useless work, *83.
——Ranges, results of twelve months' operation of, 134.
——Ranges, Tacoma City officials refuse to discontinue sale of, 398.
Central Stations (Continued):
——Rate, Providence (R. I.) company increases power, 247.
——Reconnection of service, charges for, 342.
——Refrigeration should be developed, domestic electric. By Vernon Tallman, 1124.
——Reliable service first (comment), 557.
——Residential consumption, growth in four years, *1029.
——Rules, constructive versus defensive use of rules, 790.
——Rural business in Ohio, handling, 29.
——Salaries, increasing salesmen's, reduces cost of new business, 885.
——Sales Managers' Association, growth of, in last ten years, 485.
——Service charge urged in Massachusetts, 349.
——Soliciting expense, central station and contractors' share, 342.
——System troubles, how a Michigan company helps customers to understand, *535.
——Three-phase extension for residential elevator declared burdensome, 582.
——Traction companies as customers (comment), 365.
——Truck, electric, education of user insures success. By Secor Cunningham, Jr. and L. T. Carpenter, *1270.
——Vancouver appliance sales continue at high rate, 694.
Central station management:
——Bulletins, Maine company instructs employees through weekly, 83.
——Cafeteria for company employees, *343.
——Central-station costs and income, *1067, comment 1054.
——Civic advantages of adequate power supply, *935.
——Coal contract should be based on unit of B.t.u., 84.
——Coal cost, ratio of, to total operating expenses, *484.
——Continuity of service is paramount, 1029.
——Costs, graphic illustration of increased operating, *935.
——Customer co-operation reduces peak during power shortage, *1223.
——District office reports, schedule of forwarding dates for, 28.
——Employees, educating, as to company activities (comment), 1197.
——Employees instructed in all operations of company, 839.
——Employees receive medals for heroism, seventeen utility, *1222.
——Employers warned to carry compensation insurance, 582.
——Farmers, managing electric service for. By A. W. Jones, *283.
——Industrial power charts stored compactly, *84.
——Insurance, life and health, for Chicago company employees, 133.
——Intercompany meetings of commercial representatives, 197.
——Inventories, connected load (comment), 813.
——Magazine, Pacific Gas & Electric stockholders to receive company, 742.
——Meter maintenance: Training men for some one else (comment), 909.
——Milwaukee company asks customers to curtail consumption, 789.
——Open-door policy, officers of Baltimore company maintain, 982.
——Operating expenses, investments that will reduce, 644.
——Power factor, low, penalized by increased service charge, 1222.
——Power-factor penalty works in Boston, how, 83.
——Power shortage relieved by isolated plants, 1078.
——Prizes for constructive suggestions, Samuel Insall offers, 983.
——Rate embodying coal and oil clauses, public benefits from, 28.
——Rate theories, new angle from which to look at. By Kassandra, 581.
——Right understanding of commission rulings aids public confidence, 789.
——Rural line construction in Ohio cost of, 838.
——Rural lines, ownership of, 390.
——Rural service, demand for, based on economic reasons, *817, comment 815.
——Rural service needs study (comment), 269.
——Rural service, wrong impression conveyed regarding cost of, 1271, comment 1245.
——Salvaging municipal plants when utility takes over system. By P. D. Kline, 839.
——Securities department, Pacific Power & Light Co. forms, 292.
——Service ideals in danger (comment), 813.
——Service 98.9 per cent perfect, canvass of customers shows company's, 342.
——Starting compensators, central station regulations for use of. By Vernon Tallman, 196.
——Stock, increased freight rate as argument for sale of, *581.
——Stock in exchange for bonds, utility issues, 82.
——Stock to customers and employees only, Providence company offers, 1131.
——Stock, utility's sale of, to customers, encouraging comments on, 197.
——Storeroom stocks, economies in (comments), 222.
——Tabular analysis of central stations for executives convenient, 1030.
——Vacancies interesting use of "want ads" to fill, 196.
Central station operation. (See also Boiler room: all "Station and Operating Practice" articles are indexed under these headings.)

*Indicates illustrated articles

378568

Central Stations (Continued):
——Auto-transformer for feeding two-phase motor from three-phase line. By E. C. Westcott, *188.
——Auto-transformers, operation of, to avoid trouble. By Robert Treat, 691.
——Auxiliaries, plant efficiency improved by conserving drippings from. By William Reinhardt, 1120.
——Battery discharge on unbalanced load, equalizing. By Eustace C. Soaves, *338.
——Boilers should be tagged when being worked on. By H. Hurth, 242.
——Brushes on interpole generators, shifting, changes voltage. By James Dixon, *243.
——Cable across stream, attractive construction for supporting. By H. S. Knowles, *128.
——Cable, current determined by voltage drop in 1 ft of, *691.
——Cable faults, contract-current rectifier locates. By Walter H. Millan, *1074.
——Cable, underground, handhole assists in pulling. By Henry A. Davis, *1265.
——Choke coils, wire screens on ends of, keep out birds. By P. P. Ashworth, *1120.
——Circuits, branching five 13,200-volt, on three poles, *187.
——Circuits, feeding two, with generators which cannot be paralleled. By W. A. Darter, *77.
——Coal, life of cable for conveying, almost doubled. By F. C. Ralston, 1218.
——Condenser, surface, maintenance where scale forms on tubes. By Edwin B. Ricketts, *638.
——Conduit, knockdown, work in substation construction. By G. C. Hickman and E. R. Stauffacher, *24.
——Conduit records help in making alterations, station. By Alex. Bauhan, 432.
——Cross-arms, treating, with old transformer oil. By L. C. Peterman, 1172.
——Danger sign, a universal, *930.
——Dielectric strength, reduction of, by testing, *432.
——Emergency, serving 6,600-volt load over 66,000-volt line in. By Arthur L. Lofstrand, *637.
——Emergency support for 60,000-volt line, stack of cross-ties as. By P. M. Downing, *76.
——Engine, four-valve, shows economy over turbine, 76.
——Floodlights for buildings and yards of manufacturing plants. By C. D. Gray and E. Hagenlocher, 693.
——Fuel cost in combination coal and oil, determining average, 640.
——Fuel-oil and coal-burning plants, comparison of first cost of. By F. H. Daniels, 338.
——Furnaces, arc-type, from 15 to 20 per cent reactance desirable for. By G. G. Potts, 128.
——Fuses, 45-kw. and 60-kw. outdoor-type expulsion. By Paul P. Ashworth, *386.
——Generator size, relation of lubricating oil used to, *882.
——Generator, unbalanced magnetic effect in, overcome by change of connections. By James Dixon, *1024.
——Generator used to correct power factor after engine breakdown. By W. A. Darter, 530.
——Generators, distribution of heat in windings and core of, *433.
——Generators, gritty brushes cure high mica on engine-type. By James Dixon, 288.
——Generators, operating interpole, in parallel. By James Dixon, *577.
——Gloves, simple equipment for making voltage tests on rubber, 930.
——Gloves, tank for quick and safe tests on rubber gloves, *77.
——Grounding lines before working on them, arrangement for. By P. P. Ashworth, *1171.
——Grounds on distribution circuits, exploring coil outfit locates. By W. C. Heston, *834.
——Grounds on transmission systems, effects of. By Robert Treat, 640.
——High resistance in neutral grounds, special relay permits use of. By A. W. Copley, *834.
——High tension lines, etc., testing, before applying protective grounds, *188.
——Hold-off tag prevents energizing apparatus being adjusted, *979.
——Hydro-plants, operating small, without an attendant. By H. J. Burton, 1075.
——Insulators, egg-shaped, prove serviceable on distribution lines, *577.
——Insulators, megger fork facilitates testing line. By W. R. Battey, *432.
——Insulators, strain, about 2,000 lbs. normal working load for. By L. N. Crichton, 978.
——Lightning arresters pipe frame guards, against trucks, *126.
——Line construction, safety considerations in, *835.
——Line inspectors, systematic, practiced by N. Y. State companies, 126.
——Low wire work, portable ladder platform for, *242.
——Maintaining equipment in 60,000-kva. plant, cost of, 739.
——Maintenance crews, map used to route work of city. By D. W. Roper, *578.
——Megger, proper use of, in drying out transformers and generators, *289.
——Meter block which speeds testing. By D. A. McNulty, *639.
——Metering combined power and lighting loads. By M. F. Smalley, *480.
Central Stations (Continued):
——Meters and motor equipment, rules for installing, 1266.
——Meters, charging 25-cycle, for 60-cycle operation. By P. M. Cordell, 78.
——Meters, pilot lamps denote failure of potential on high-tension meters, *289.
——Meters, spring rack prevents damage to meters in automobile. By T. T. Thomas, *690.
——Oil, moisture tests and evaporation tests on. By C. D. Basler, 288.
——Outdoor night work, portable generator and lamps for. By Fred W. Bagnall, *1217.
——Parallel operation, checking connections for. By James Dixon, *1171.
——Pipe-thawing outfit for coming winter. By H. S. Rush, *480.
——Poles, raising, with insulators attached saves time. By Paul P. Ashworth, *338.
——Pole setting, machine reduces cost of hole digging and, 25 per cent. By P. O. Reyneau, *931.
——Power factor quickly read from table supplied to metermen. By C. C. Moler, 1172.
——Primary line records, system for keeping up to date. By John H. Mitchell, *1074.
——Production costs of Detroit company at Connors Creek station, *1025.
——Reactor, unbalanced, on three-wire generator causes flicker. By R. H. N. Lockyer, *187.
——Rope, shocks received through defective, 23.
——Run-off has no constant ratio to rainfall, *189.
——Rural transformer installation for $375, company supplies 2.5 kva. By D. O. Vaughn, *882.
——Standby plants, rehabilitating. By J. W. Andree, *22.
——Station records used to improve operation, 785.
——Station trouble, rules to follow during, before consulting dispatches. By H. J. Burton, 1217.
——Street-lighting maintenance cost analyzed, 637.
——Substation, galvanized piping used for buses on outdoor. By Lewis A. McArthur, *385.
——Substation, simplified low-cost, *1121.
——Switch and grounding device, combined outdoor. By P. P. Ashworth, *881.
——Switch changes, dispatcher's board that facilitates. By F. W. Pollock, *690.
——Switch for wattmeter, home-made reversing. By R. H. N. Lockyer, *242.
——Switch, reversing, for meters which has 190 microhms resistance. By E. C. Soares, *23.
——Switches and meters, rules for connecting service, 881.
——Switches mounted on two-circuit steel tower, *978.
——Switch, shunting, permits testing large meter without killing line. By J. S. McCarthy, *243.
——Synchronizing, safe method of. By R. H. N. Lockyer, *978.
——Synchroscope for instruction purposes, easily constructed. By Leslie F. Carter, *529.
——Testing insulators and bus supports. By Allen Ramsey, *1024.
——Thrust-bearing trouble caused by increasing oil pressure, 23.
——Tower, standard, adapted for switch mounting, *1075.
——Trailer reduces central station's hauling expense. By G. Genung, 835.
——Transformer, increasing current of constant-current, in emergency. By Eustace C. Soares, *881.
——Transformer installation that provides clear working space, *1120.
——Transformer insulation and oil, drying, before operating. By James Dixon, 78.
——Transformer, potential, strap iron employed as rigid lead for. By U. R. Bauket, *188.
——Transformers, connecting, across proper phase increases output. By Cornelius G. Weber, *1218.
——Transformers, differentially wound watt-hour meter for testing current. By E. C. Wescott, *433.
——Transformers, instrument, mounting plate saves time in replacing. By Walter H. Millan, 979.
——Transformers made weatherproof, *739.
——Transformers, pole-top hoist saves time in raising. By W. R. Battey, *288.
——Transformers, 28-ton auto-trailer hastens, to stations, *578.
——Transformers, two, used in place of damaged balance coil. By W. D. Hardaway, *1121.
——Transformers, standard accessories that must be furnished with, 479.
——Transmission line, anchoring a, to an old chimney. By L. J. Chase, *738.
——Transmission lines, chart shows tension and sag for, *529.
——Transmission trouble, large birds found to be cause of, 126.
——Turbine room, ventilating system which prevents condensation in. By Sabin Crocker, *339.
——Turbines to use for different loads on plant, chart shows. By S. N. Clark, *127.
——Turbo-generator fire protection, water-spray system for. By F. T. Leilich, *385.
——Wires, copper and aluminum, melting current of, compared, 1265.

Chamber of Commerce declares for the prohibition of utility strikes, 301, comment 269.
Chicago:
——Commonwealth Edison has not asked for higher rates, Insull tells why, 89.
——Commonwealth Edison Co. issuing $5,000,000 of stock at par, 846.
China:
——Electrical development in, 122.
——Exporting electrical goods to China (comment), 909.
Cigar lighter. Duralectric Corporation, 1289.
Cleveland boosts electrical service, 943.
Clock, time. General Electric Co., 360.

——Belt drives, removing slack from short, by means of weights. *580.
——Belts on individual motor drives, tightening short. By Alex. H. May. *1267.
——Brushes, cards for recording performance of motor. By W. A. Harris. *245.
——Cable, pulling, without tackle or windlass. By A. Pertle. *932.
——Changes in factory distribution visualized by cardboard models, proposed. By A. H. May. *1221.
——Circuits, outfit to test for high-resistance. By Eugene Tyler. *245.
——Coal-mine distribution circuits, safe construction for, 1123.
——Compensator mounted on strap-iron support. By A. R. McDonald. *531.
——Conductors on steel members, supporting openwork. By C. Walker. *290.
——Conductors, running openwork, through concrete beams. By James B. Bond. *884
——Crane shutdowns, classified causes of electric, 643.
——Current-transformer connection board. By A. R. McDonald. *1027.
——Cut-out cabinet with watchman switch adjacent, practical. By H. S. Knowles. *244.
——Direct-current line drop, chart for easy determination of. By L. J. Voorhees. *481.
——Distribution, open and conduit wiring combined for economical factory. By John Schiehser. *191.
——Elevator, stacking, mounted on industrial tractor. By C. W. Geiger. *129.
——Energy consumption in manufacture of ferro alloys, 195.
——Fiber, cutting to narrow widths. By H. Knowles. *740.
——Furnace, improper electrodes will stick in operating brass. By James S. Brusster, 1123.
——Generator and switchboard arrangement to give 220 volts to 2,300 volts. By A. R. McDonald. *26.
——Granite quarry, motor load at. By C. R. Broadhead, 787.
——Grid connections, simple, to give wide range of resistance. By Eustace C. Soares. *1173.
——Hysteresis and eddy current losses in iron, separating, *1220.
——Lamp, portable storage battery, for very damp locations. *693.
——Lamps, light and small test. By Edward Hatch. *79.
——Light in offices, effective, 434.
——Lighting, cost of good, only 1.41 per cent of labor cost, 388.
——Lighting efficiency decreased 20 per cent by pulleys and columns. *836.
——Lighting fixture, industrial, which may be raised, lowered or detached. *884.
——Lighting fixtures, determining economical interval for cleaning. *1122.
——Lighting fixtures, dust on, reduces light 25 per cent, 837.
——Lighting in modern automobile factories, 788.
——Magnetic clutch and button control make toggle presses safe. By J. K. Govan. *981.
——Motor arranged for either 440 volts or 220 volts. By C. A. Johnson. *1269.
——Motor, avoiding unbalanced operation of two-panel. By James Dixon, 387.
——Motor, control and grinder in compact arrangement. *1026.
——Motor distribution and consumption in steel plant requiring 117,852 hp., 130.
——Motor drive takes less power for starting with chain than with belt. By H. E Stafford. *25.
——Motor, squirrel-cage; changing speed without changing horsepower. By A. C. Roe, 1220.
——Motors, emergency operation of induction, at low speed. By C. G. Hadley, 388.
——Motors, 40 cycle, operated on 60 cycles to utilize old equipment. By C. W. Leonard, 741.
Industrial Applications (Continued):
——Motor maintenance and installation, card record saves time in. By A. R. McDonald. *642.
——Motors, maximum speeds for, recommended by Electric Power Club, 1267.
——Motor overload protection, efficient system of. By A. R. McDonald. *388.
——Motor record card facilitates ordering spare parts. By Frederick Krug. *191.
——Motor-starting switch, emergency control for. *980.
——Motor, synchronous, starts primed pump through magnetic clutch. *79.
——Motor windings, protecting against acid fumes. By W. B. Todd. *190.
——Motors, inspection system which keeps 1,200, running. By H. E. Wood 884.
——Motors, reducing 1,430 hp. in, to 1,250 hp. saves $1,000 a year, 340.
——Motors, steel mill, proper housing and ventilating of. By O. Needham. *1219.
——Motors, synchronous, advantages compared with induction, 579.
——Motors, synchronous, advantage of motor-driven exciters for. By H. L. Burns. 1173.
——Motors, synchronous, for mill drives said to be impracticable, 245.
——Motors, two, connected in parallel drive same load. By Eustace C. Soares. *641
——Motors, two 500-hp. a.c., divide hoist load equally. By F. C. Stanford. *27.
——Operating indoor transformers partly exposed to weather. By H. S. Knowles. *27.
——Outlet boxes, setting, in reinforced concrete columns. By Nicholas F. Condron. *131
——Photometer tests, blanks for recording. By D. W. Blakeslee. *741.
——Pier illumination requires far more attention to surrounding surfaces, 482.
——Poles, crane wires and lamps on same, concrete. By H. S. Knowles. *1174.
——Power factor, static condenser raises industrial, from 60 to 90 per cent. By E. A. Roeser. *195.
——Power, graphic charts showing cost of electric, help plant management. By D. W. Blakeslee. *194.
——Pulley sizes, standard, for motors recommended by Power Club, 580.
——Pumps, poor alignment causes most troubles of centrifugal. By John M. May. 836
——Rheostats, connection of, for testing. By Eustace C. Soares. *579.
——Rivets out electrically in five seconds, three-quarter-inch. By J. A. Osborn. 290.
——Rivets, machine-electrically heats, in series. By Alex. Stirling (D). *643.
——Shovel, electric, economical in excavating canal, 932.
——Solenoid, double-acting, which has strong pull. By J. W. Murray. *435.
——Speed, best way to take. By D. W. Blakeslee, 340.
——Storage-battery maintenance systems for good operation. By Anderson Pace 932.
——Substation in narrow space, compact industrial. *341.
——Substation, portable, mounted on sled. By F. E. Gray. *131.
——Sweating, keeping electrical machines warm prevents sweating. By O. Needham, 79
——Switch, home-made inclosed reversing, prevents shock. By E. C. Soares. *190.
——Switch, starting, mounted directly on grinder frame. *1173.
——Switch, window bricked in to hold service. By A. Johnson. *291.
——Switchboard arranged for quickly making wide range of tests. By W. H. Farr. *192.
——Synchronous motor, starting a, without starting equipment. By Frederick Krug, 482.
——Test clips with insulating handles. By Philip G. Bernholz. *290.
——Tests of lamps and fuses, board for quick. By F. Krug. *340.
——Textile motors attached directly to spinning-frame cylinders. By L. R. West. *1076.
——Tractor, does heavy hauling on 25 per cent grade. By D. L. Darnell. *81.
——Tractor economies, industrial, 481.
——Tractor, saves 50 per cent at unloading pier. By Frederick B. Fink, 1026.
——Trolley and runway, serviceable. By Walter H. Millan. *1123.
——Voltages, various single-phase, from three-phase generator. By Eustace E. Soares. *532.
——Welding electrode, flat, requires less skill. By W. W. Palmer. *883.
——Welding pipe, energy requirements in butt-. By G. T. Jacocks. *1267.

——Employer held responsible for death supposedly caused by 110 volts, 849.
——Erroneous instruction on reasonable case upsets verdict, 1186.
——Financing by state of line construction, contract for, upheld, 544.
——Flooding land, damage from, 97.
——Franchise, purchasers of void, may discontinue operation, 1042.
——Franchise rights, consent of municipal authorities and right to injunction, 41.
——Fraudulent transfer, 754.
——Highway crossing railroad track, electric companies may use, 1186.
——House moving and poles in street as nuisances, 849.
——Injury must be shown in order to bring reversal of judgment, 657.
——Injury to uninvited visitor, owners not liable for, 208.
Legal decisions (Continued):
——Jurisdiction of court of equity in case appealed from commission, 208.
——Jurisdiction of court, public service commissions law does not oust, 1282.
——Jury entitled to know that witnesses in damage suit represent insurance company, 897.
——Law, fourteen-year-old, becomes confiscatory, 1234.
——Missouri commission enjoined from enforcing rate based on original cost, 1036.
——Modification of contract in accordance with approved provisions, Massachusetts department without power to prevent, 145.
——Municipal plants in Arkansas, establishment of, 546.
——Municipalities in Ohio, powers of, 496.
——Negligence and defective insulation, 802.
——Negligence in furnishing safe place to work a question of fact, 208.
——Negligence of electric company must be proximate cause of death to justify verdict for damages, 208.
——Negligence under California workmen's compensation act, 594.
——Negligence, what constitutes, 594.
——Niagara, right to construct tunnel at, sustained, 704.
——Operation at a loss cannot be compelled, when utility abandons property, 1136.
——Overflow, eighteen years' silence does not outlaw suit for damages from, 145.
——Operation may be discontinued where utility can only be run at a loss, 1186.
——Power Co. wins right etc.:
Correction, "Bulk energy supply in competitive territory not allowed." 1184.
——Power to fix charge retained by state, 754.
——Powers of trial judge in jury case involving alleged injury from erection of dam, 353.
——"Proximate cause," definition of, 993.
——Public service commissions and the Fourteenth Ammendment, 257.
——Public Service Commission, functions of, 208.
——Public utility procedure not changed by creation of Kansas court of industrial relations, 449.
——Railroad commission, powers of Michigan, 401.
——Rate base, principles applying to determination of present-day, 1234.
——Rate-fixing powers, commission's—equal protection—franchises not property, 41.
——Rate-fixing powers of commission, emergency, 754.
——Rate fixing, value of franchise in, 1234.
——Rate increases not retroactive, 657.
——Rate procedure in N. Y. State, 1042.
——Rate, schedule, collectible even if commission investigation is proceeding, 657.
——Rates, action by commission a prerequisite in raising contract, 41.
——Rates, legislative power of municipality to fix utility, cannot be abridged, 657.
——Rates, moral debt by company where excessive, have been paid, 594.
——Rates, power of utility to increase, without sanction of commission, 97.
——Rates prescribed by ordinance unreasonable, burden on utility to show, 657.
——Rates, unjust, cannot be approved by commission, 594.
——Rates, utility cannot increase franchise, without action by commission, 945.
——Rehearing from commission need not be asked before court action, 594.
——Responsibility for damages caused by fire set by employees, 304.
——Seattle's new plant, judge refuses to hinder, 304.
——Scope of review of facts, 802.
——Service, public utilities may be forced by mandamus to continue, 1282.
——State and municipal function, 704.
——Station commission, powers of, to modify city franchise, 255.
——Streets, privilege of using, 496.
——Transformers, no obligation on company to guard, 1234.
——Tree-trimming rights, 208.
——Water, manner of flowing, over another's land cannot be materially changed without consent, 657.
——Water rights at Dolgeville, N. Y., title to, 97.
——Wire, broken or fallen charged, in street presumptive evidence of negligence, 993.
——Wire over unopened highway, liability for injury from, 208.
——Wire strung through tree, company liable for injury to child from, 208.
Lighting, electric. (See also Lighting, industrial and Lighting, street.)
——Alternating-current. By V. G. Goodwin (D), *198.
——Brightness and allied considerations (comment), 1103.
——Calculation of illumination, graphical. By K. S. Weaver, *880.
——Christmas tree lamp. Westinghouse Lamp Co., 1001.
——Christmas-tree outfit. General Electric Co., *215.
——Coefficients of utilization. By Ward Harrison and Earl A. Anderson (D), 135.
——Color of walls and ceilings, effect of, on resultant illumination. By A. L. Powell (D), 135.
——Daylight, artificial, for merchandising and industry. By G. H. Stickney (D), 248.
——Data file, 143.
Lighting, electric (Continued):
——Defective lighting said to cause annual accident loss of $300,000,000, 894.
——Direct and indirect illumination, designing. By M. M. Samuels and C. O. von Danenberg, *721, comment, 718.
——Dyes, machine to test permanence of. Atlas Electric Devices Co., 1001.
——Feeders, relation of, to watts per square foot. By Victor Tousley, 686.
——Glare, cut, and save energy (comment), 413
——Illumination and safety to be discussed at joint meeting, 798.
——Illumination, monograph on. By George A. Hoadley (D), 1224.
——Indirect, equipment, maintenance of. By J. L. Stair (D), 646.
——Intensity of illumination on functions of importance to the working eye. By C. E. Ferree and Gertrude Rand (D), 936, comment, 910.
——Motor-car headlights and rear lights in relation to traffic requirements. By J. W. T. Walsh (D), 438.
——N. E. L. A. to conduct lighting demonstrations through new department, 543.
——Railroad signals, of. By L. C. Porter and F. S. Stallknecht (D), 439.
——Reflection factors, measurement of diffuse, and a new reflectometer. By A. H. Taylor (D), 984.
——Ryan, W. D'A., talks on achievments in, 1036.
——Office buildings and drafting rooms, lighting of. By A. L. Powell (D), 391.
——One hundred and ten volts versus 220-volt circuits from the standpoint of lighting service. By F. J. Gray and E. B. Fox (D), 438.
——School, should give 6 to 12 ft. candles, 18.
——Schools, lighting of. By A. L. Powell (D) 438.
——Shadow shield. Western Electric Co., 47.
——Show windows and show cases, lighting. By A. L. Powell (D), 536.
——Sign lighting, development of electric. By E. A. Mills (D), 744.
——Spotlight. Chicago Cinema Equipment Co., 857.
——Theater aisles, light for. Chicago Electric Light Co., 857.
——Theater, lighting the world's largest, *776, comment, 766.
——Traveling lights for display on Christmas trees. Edward A. Dieterich, *664.
——Walls and floors—their effects on lighting. By Van Rensselaer Lansingh (D), 85.
——Window, color screen for. National X-Ray Reflector Co., 503.
Lighting, industrial:
——Accidents and. By J. M. Woltz, 1216.
——Demonstrating effective, *865, comment, 862.
——Exhibit to open in San Francisco, 895.
——Holder, flexible light. Sterling Co., 1001.
——Lamp hanger, incandescent. Thompson Electric Co., 857.
——Machine tools, illumination for. By G. Wagschal, *925.
——Maintenance of lighting system. By A. L. Powell (D), 294.
——Mass production, as an element in. By Leon Gaster (D), 31
——Oregon, modern, for. By F. H. Murphy, *820, comment, 815.
——Output, necessity for standards in the relation between illumination and. By Ward Harrison (D), 646.
——Piers and warehouses, lighting. By A. L. Powell and R. E. Harrington (D), 344.
——Practical demonstration for jobbers at Nela Park, 654.
——Printing-plant, effective. By A. D. Bell, *1153, comment, 1151.
——Production and illumination. By R. E. Harington (D), 1224.
——Productive illumination intensities, the real meaning of. By Davis H. Tuck, *684, comment, 670.
——Reflector for, R. L. M. standard. By Ward Harrison (D), 744.
——Textile mills, lighting of. By A. L. Powell (D), 391.
——Wisconsin lighting code now in effect for old installations, 91.
Lighting, street:
——"Electrical World" tables for 1920, issued, 1231.
——Ornamental, tendencies in. By L. A. S. Wood, *324.
——Park system, maintenance of equipment on Lincoln. By C. H. Shepherd (D), 583.
——St. Louis, cost nearly doubled, 644.
——St. Louis, electric lighting replaces gasoline park lamps in, 444.
——Units, developments in. By A. D. Cameron and C. A. B. Halvorson (D), 135.
Lightning:
——Arrester, self-contained low voltage. Westinghouse Electric & Mfg. Co., *664.
——Arresters. By C. E. Bennett (D), 1225.
——Arresters, oxide-film, life and permanence tests of. By N. A. Lougee (D), 1272.
——Protection discussed by A. I. E. E., 1040.
——Protection of 4,000-volt lines, *973, comment, 959.
——Protection, theory and practice. By F. A. Brackett (D), 1127.
Line construction, closer supervision of (comment), 1005.
Lubricating oils and greases, writing specifications for. By A. A. Potter and A. J. Mack, 281.

——Locomotives, methods that will make electrical parts run efficiently (D), 439.
——Signal systems, designing. By R. H. Bacon, *372, comment, 367.
Missouri River Electrical Distributors' convention, 847.
Mixer, aërating, for kitchen use. Air-O-Mix Corp., 1000.
Montana's first electrical show, *1088.
Motor cars, lighting and starting of, by electricity (D), 792.
Motor repairs:
——A.-C. machines, inserting magnetic slot bridges to improve operation of. By James Dixon, 579.
——Armature bands, calculating stresses in. By H. E. Weightman, 192.
——Armature repairs in large steel mill, contest which reduced. By D. W. Blakeslee, 531.
——Brush holder, oil on causes commutation trouble. By C. A. Johnson, *692.
——Coils, insulating ends of, with cambric, saves time. By C. A. Johnson, *80.
——Coils, machine for winding armature. By L. E. Wood, *387.
——Coils, stand for holding reel while winding. By L. E. Wood, *291.
——Commutator, turning a, in place. By James Dixon, *129.
——Commutators on new machines, care and operation of. By James Dixon, 1268.
——Commutators, smoothing, by sanding and stoning. By Donald S. Merton, 1221.
——Cost records of motor repair shop used to classify expenses. By J. B. Tufts, *1175.
——Crossing of wires in armature coils, eliminating troublesome. By C. A. Johnson, *482.
——Data sheet for armature windings and repair information, *787.
——Induction motors, connecting three-phase. By A. C. Roe, *171, (with supplement)
——Interpole machines, careful adjustment advisable with. By James Dixon, 980.
——Interpole motor, wrong brush position changes speed of. By James Dixon, *692.
——Interpole winding, removal of shunt from, improved operation. By James Dixon, 883.
——Maintenance costs per motor average 50 cents a month. By H. L. Burns, 1077.
——Oil rings, beveling of, prevents sluggish action. By Philip G. Bernholz, *1027.
——Phase rotation, rewound motor for testing. By A. C. Roe, 740.
——Rack for small wire reels which maintains proper tension. By A. C. Roe, *933.
——Reconnecting 220-volt compound motor for 110 volts. By C. A. Johnson, 643.
——Record keeping, subdivision of motor maintenance items assist. By J. B. Tufts, 291.
——Rewinding motor with odd coil groupings. By C. A. Johnson, *25.
——Rewinding two-phase motor for three-phase operation. By A. C. Roe, 883.
——Rewinding 220-volt induction motor for 550 volts. By C. A. Johnson, 341.
——Rotor, test for defective squirrel-cage. By Philip C. Bernholz, 788.
——Short circuits in armature coils, device to detect. By A. Munoz, 1027.
——Slip rings to shaft, expanding sleeve method of fastening, *80.
——Slotting tool with interchangeable tool-steel blades. By W. A. Harris, *1122.
——Switchboard for testing motors, convenient home-made. By M. Haman, *1076.
——Synchronous motor, changing a generator to a. By R. H. N. Lockyer, *980.
——Synchronous motor troubles, how to remedy some. By James Dixon, 81.
——Two-phase motor, reconnecting a, for three-phase operation. By C. A. Johnson, 532.
——Voltage, halving motor, by adding commutator bar. By C. A. Johnson, *244.
——Wagon, motor-repair trouble, *435.
——Wedges, device holds motor, while driving them into place. By C. A. Johnson, *740.
Motor repairs (Continued):
——Windings, cost of reinsulating induction motor. By J. A. Knutsen, 164.
——Work-order records for motor repair shop. By J. B. Tufts, *1026.
Motors:
——Alternating-current, small. American Radio & Research Corp., *952.
——Ball-bearing type. Cleveland Electric Motor Co., *152.
——Direct-current, for crane and hoist work. By F. L. Moon (D), 1224.
——Direct-current, variable speed, shunt-wound (D), 744.
——Forty degree-fifty degree investigation to be sponsored by A. I. E. E., 1227.
——Forty-degree vs. fifty-degree motors for steel mill, users and producers discuss, 1220.
——Forty-deg. and 50-deg., advantages of. By L. H. Rittenhouse, 125.
——Fractional-horsepower.
A-C Electrical Mfg. Co., 1001.
H-G Mfg. Co., *1097.
——Induction:
Core losses. By P. L. Alger and R. Eksergian (D), 936.
Improving power factor conditions with. By R. G. Warner and A. E. Knowlton, *1021, comment, 1006.
Two-phase, reconnecting. By A. C. Roe, *683, comment 670 (with supplementary chart).
——Industry, application of power to modern, *165, comment, 158.
——Inspection and maintenance, systematic, *179, comment, 158.
——Loading of electric, continuous, occasional and intermittent. By Blanc (D), 1080.
——Portable power stand. Delco Light Co., 553
——Rating of, for intermittent work. By Adler and Schiebler (D), 583.
——Standardization, features requiring. By C. W. Starker, *919.
——Starters:
Induction-motor starting switch. Union Electric Mfg. Co., 104.
Time-limit automatic. Cutler-Hammer Mfg. Co., *761.
——Steel-mill, keeping, in service. By O. Needham, *237, comment, 222.
——Three-phase, graphical method for analyzing the performance of cascade-connected. By J. Kozisek (D), 646.
——Traction, dimensions of single phase. By F. Unger (D), 31.
——Utility, on tripod base. Westinghouse Electric & Mfg. Co., *1144.
Municipal ownership:
——Costly experience resulting from political interference, *376.
——Fiasco of government and (comment), 1101
——Manufacturers urge city to replace municipal with purchased energy, 351.
——Municipal point of view, a queer (comment), 413.
——National Association of Railway and Utility Commissioners criticize public ownership and operation, 1028.

N

National Association of Electrical Contractors and Dealers:
——Convention, business and pleasure to blend at, 205.
——Convention, industrial business and merchandising to be discussed, 655.
——Convention; merchandising electrical appliances has attention, 752.
——Convention (comment), 765.
——Labor committee, vote to continue, 706.
National Association of Electrical Inspectors:
——Discuss grounding of secondaries, 846.
——Experts to address, 350.
——Underwriters will talk to, 748.
National Association of Manufacturers, political program (comment), 53.
National Association of Railway and Utility Commissioners:
——Oppose government ownership, favor higher rates, 1039.
——To discuss public relations, 844.
National Electrical Code: comment—Unnecessary tax on industry, 861.
National Electrical Credit Association, annual convention; discuss cost-accounting system, 95.
National Electric Light Association:
——Accounting course, reduces price of advanced, 302.
——Coal car priority order, requests continuance of, 347.
——Comments, 1.
——Executive committee meeting, manufacturers attend, for first time, 489.
——Executive committee meeting Sept. 1, 350.
——Geographic divisional committee meetings, itinerant (comment), 1149.
——Good-will advertising, approval given to direct, 1277.
——Good-will advertising program developing rapidly, 892.
——Good-will appeal to holders of electric light and power securities, *943.
——Good-will campaign (comment), 669.
——Great Lakes section organized, 490.
——Hydraulic power committe formally organized, 702.
——Iowa section, annual convention, *38.
——Iowa section, committee of, urges increased electric rates, 940.
——"Kilo Watt" publicity going strong, 650.

Investigations in progress or completed, 137, 392, 585, 793, 1033.
Suggestions for research, 137, 392, 585, 793, 1033.
——Information bureau established, research, 1134.
——Nela Research Laboratories, reorganization of, 351.
——Science, research in pure. (Comment), 109.
Resuscitation through pain inflicted by a blow. By W. P. Strickland, 929.
Rheostat, potentiometer control. By J. Damien (D), 584.
Rice, Edwin Wilbur, Jr., *672.
Roentgen rays; Coolidge X-ray tube, evolution of (D), 536.
Rural electricity supply, development of (D), 1126.
Rural extension, factors governing. By G. C. Neff, *1205, comment, 1198.
Rural lines, strength must not be sacrificed in (comment), 1149.
Rural service controversies unnecessary (comment), 557.
Rural service will help solve national problems (comment), 1053.
Russia, electric power production in Soviet, 1133.
Rust, anti-, compound. Convention products Corp., 264.

S

Sales Managers' Association sees desire on part of customers to help the utility, 206.
Scientist, co-ordinating the work of, and engineer. By John Mills, 689.
Searchlight:
——Arcs, color and special composition of certain high-intensity. By I. G. Priest, W. J. Meggers, K. S. Gibson, E. P. T. Tyndall and H. J. McNicholas (D), 1032.
——Control of, distance (D), 887.
——Spectral transmission of the atmosphere, relative. By Enoch Kamer and E. P. Tyndall (D), 887.
Seattle:
——Municipal plant to install stokers to guard against fuel shortage, 1232.
——Sectionalizing devices, automatic. By P. Charpentier (D), 344.
Self-interest:
——Financing utilities, in (comment) 461.
——Spreading the, idea (comment) 53.
Sheldon, Dr. Samuel, memorial exercises for the late, 988, 1037.
Ships:
——Battle cruisers, power of new, comparable to largest central station, 1072.
——Cargo, electric versus diesel-engine drive for, 1134.
Ships (Continued):
——Electrical installation for, design of. By C. H. Wordingham (D), 744, 887.
——Ocean freighter, first electrically propelled, has trial trip, *847.
——Propulsion of, electric. By Eskil Berg (D), 136.
——Propulsion of, electric. By Charles Rettie (D), 792, 1031.
——Welded ship Fullagar, electrically (D), 439.
Signal Corps asks Congress for $10,697,000, p. 1232.
Society for Electrical Development:
——Bi-monthly meeting, first, 206.
——Christmas campaign, electrical, 591, 797, *895, 1040, 1184.
——Local organizations, may form, 988.
——Weekly conferences, holds, *703.
South, proposed power district in the. By L. A. Whitsit, *1009, comment 1007.
South America:
——Electrical possibilities in. By Verne Leroy Havens, 729.
——Operating conditions. By Victor M. Arana, 384, *1073.
Southern California Edison Company advocates an "equalizing service," 991.
Spain, electrical goods in, 1225.
Spain, electricity in. By Blumenthal (D), 744.
Static frequency doubles, characteristics of By T. Minohara, (D), 33.
Statistics:
——California, industrial board in, *428, comment 415.
——Central-station capacity increasing fast, *332.
——Central station customers' growth, *161, comment 157.
——Central-station energy output and revenue, April, *17; May, *285; June, *469; July, *687; August, *926; September, *1112.
——Central-station expansion in 1920, 518.
——Central stations, 1917. U. S. census of, *476, comment 463.
——Electrical industries growing. *1214.
——U. S. Geological Survey figures on energy production and fuel consumption, 654, 800, 1040.
Steel Mill:
——Application of power in, *673, comment 671.
——Drive, electric, equaling steam on tonnage basis, *653.
——Drive, rolling-mill. By L. Pothera (D), 1272.
——Installation, six hundred engineers inspect 50,000 hp., 35.
——Motors, 40-deg. vs. 50-deg., users and producers discuss, 1229.
——Repair shop practice, electrical. By R. Justanding (D), 86.
Sterilization of milk, electrical (D), 391.
Stone & Webster, commercial agents, convene, 751.
Stoves, electric:
——Early. By R. P. Ingalls, 576.
——Range lower initial cost of building, electric. By L. P. Perry, *790.
——Ranges, market in United States for 75,000 electric, *483.
——Twenty years in service. By W. J. Boggs, 528.
Steam-flow records, centralized, would be helpful. By Byron E. White, 1073.
Substations:
——Automatic, discussed at Providence, 799.
——Automatic industrial, first. By S. G. Leonard, *417, comment 414.
——Industries, for suppliyng large. By R. H. Tillman, *231, comment 222.
Super-power zone:
——Advisory board meets for first time, 699.
——British government scheme and national fuel economy. By David Brownlee (D), 646.
——Coal prices receive attention, 1083.
——Engineering staff almost completed, 253.
——Engineering staff of, wide publicity advocated by, 445.
——Engineering staff investigation, W. S. Murray heads super-power zone, *91.
——Engineering staff, organization of, *447.
——South, proposed power distribution in the. By L. A. Whitsit, *1009, comment, 1007.
——Stations, mines versus tidewater as locations for, 1207.
Supplements:
——Motors, connecting three-phase induction. By A. C. Roe. With July 24 issue.
Sweden:
——Hydro-electric energies, utilizing, in *1167, comment 1151.
——Railroad system, electrification of (D), 135.
——Telephone from Stockholm to Berlin. By A. Holmgren (D), 249.
——Transmission line at 220,000 volts planned for, 1087.
——Water power legislation, new. By R. Garding (D), 487.
Switches:
——Air-break, improvements needed in high-voltage. By Frank Howard, 286.
——Contactor fits fuse clips, mercury. Absolute Con-Tac-Tor Co., *1289.
——Disconnecting, magnetic forces in, *1263.
——Disconnecting, when wrong, was left open (comment), 766.
——Interruption of alternating current without arcing. By W. Höpp (D), 1178.
——Oil, for large electrical supply systems (D), *1127.
——Switchboard, steel versus marble. By R. H. N. Lockyer, 384.
——Switchgear, continental. By W. A. Coates (D), 1127.
Switzerland:
——Gösgen, water power plant at (D), 248.

——Transmitter, the carbon. By H. J. Gregory (D), 392.
Tenney, Charles H. and Co. Convention at Boston notable success, 95.
Tennessee Association of Electrical Contractors meet, 443, pledge support to utilities in fight for relief, 655.
Tesla, Nikola, *272.
Testing automatic apparatus for intermittent. By G. W. Vinal and L. M. Ritchie (D), 487.
Thalophide, spectro-photo-electric sensitivity of. By W. W. Coblentz (D), 439.
Thermal conductivity during fusion of metals, variation of. By Seibel Konno (D), 1273.
Thermocouples, electrically deposited (D), 584.
Thermo-galvanic effect, the Benedicks. By Gonineau (D), *697.
Tonawanda (N. Y.) accident, authoritative report on. By John L. Harper, 1023, comment 1005.
Traction. (See Railways.)
Trade conditions (see also Foreign Trade and business).
——Appliances, output of motor-driven, in 1920 estimated at 2,000,000 units, 708.
——Arc lamps again showing good demand, 356.
——Armored-conductor market expected to continue strong, 100.
——Asbestos wire, active demand for, 548.
——Automobile slump (comment), 813.
——Automobile slump reflected in electrical output, 805.
——Boxing and crating, practical instructions in, 1237.
——Brass, low prices should offer favorable market, 1189.
——Bureau of Foreign and Domestic Commerce sends funds to carry on improvements, 1045.
——Cable, power companies ordering, well, 149.
——Cancellations of orders menace trade, 659.
——Cancellation of orders slows down factory output, 891.
——Car shortage curtailing industrial production, 211.
——Chain blocks, good demand for motor-driven, 43.
——Christmas-tree lighting outfits, market undersupplied, 900.
——Collections, credit men optimistic in face of lengthening, 901.
——Collections in Northwest long, 996.
——Collections, relation of stock-moving methods (D), 804.
——Collections slower, trade optimistic although, 355.
Trade conditions (Continued):
——Collections somewhat harder, jobbers in general finding, 210.
——Collections, use of trade acceptances improving, 659.
——Commutator segments, normal buying of, 356.
——Conduit production of, still six to seven months behind orders, 996.
——Conduit, supply of rigid, offers no immediate relief, 404.
——Contracts, manufacturer banks recognition of integrity of, 1138.
——Coolidge lamp patent suit, United States district court upholds, 99.
——Copper goes below pre-war level in October, *947.
——Cotton belt, favorable outlook seen in, 1236.
——Cotton, low, has not affected prices of electrical goods, 451.
——Conduit situation, Northwest, slightly tighter, 1188.
——Deflation in the electrical industries (comment), 861.
——Discounts, larger, may reward modern selling methods, 1138.
——Election and the political outlook (comment), 957.
——Electric sheet prices easier for 1921 shipment, 1139.
——"Electrical World" trade service increased, 542.
——Fan manufacturers optimistic over prospects for 1921, 756.
——Fan stocks, hot weather would leave short, 147.
——Farm-light producer builds up plant sales, 1092.
——Farm-lighting plant sales better, prospect for, 804.
——Fiber-conduit production booked well into fall months, 355.
——Flexible-armored conductor market is weak, 1093.
——Freight movement, manufacturers assist yardmen in, 100.
——Furnace, non-ferrous electric, orders holding well, 210.
——Glassware packing charges, how should, be handled?, 1188.
——Graphic-recording meter market growing fast, 260.
——Heater, beam type, suits, Majestic patents upheld in, 211.
——Heater suit, Simplex and Westinghouse companies win, 851.
——Heaters, heavy buying of, in winter just passed, 99.
——Heaters, heavy production for 1920 season, 1044.
——Heating appliances, increasingly popular, 147.
——Heating appliances, prospects of shortage in, 597.
——Household appliance manufacturers aim to develop new devices, 403.
——Insulating paper scarce, but outlook hopeful, 451.
——Insulation, lower cotton reflected in prices of, 851.
——Insulation, weak market for, 1237.
——Insulators, high-tension production, long deliveries of, 1188.
——Insulators, high-tension, strong market ruling for, 259.
——Jobbers' costs of handling twelve principal lines, 1092.
——Jobbers doing $50,000,000 business annually, electrical, 805.
——Jobbers find household deliveries becoming less profitable, 804.
——Jobbers, need of co-operation among, 708.
——Jobbers' stock turnover, increasing, by manufacturers' co-operation, 851.
——Jobbers' volume of business 60 per cent above that of last year, 702.
——Labor, reduced, helping to lower factory costs, 1188.
——Labor situation, decided improvement seen in, 596.
——Lamp business, miniature, big future seen in, 804.
——Lamp buying, fall, under way with good local stocks, 757.
——Lamps, Coolidge, patent case, appeal filed in, 147.
——Lamp sales expected to reach 230,000,000 this year, 1044.
——Lamp sales of 1920 expected to surpass 1919 from 25 to 30 per cent, 707.
——Lamp turnover policy to hold in 1921, present, 1284.
——Lamp voltages, standard, to reduce list of stock items, 1092.
——Lighting glassware raw materials show little shortage, 451.
——Line-material stocks low, poor shipments keep, 210.
——Loom prices firm despite falling cotton market, 548.
——Manufacturers, opportunity for electrical (comment), 862.
——Middle west, apparatus held in, for rising market, 1045.
——Montana, brighter prospects for electrical market in, 805.
——Motor market, tendencies of, point to higher cost, 211.
——Motors, easier conditions seen in supply of, 660.
——Motors, integral horsepower, demand easier, 261.
——Motors, need of standards in fractional horsepower, 148.
——New York jobbers interchange surplus stocks, 1138.
——New York jobbers see bright side to present trade conditions, 1093.
Trade conditions (Continued):
——Northwest appliance sales below 1919 holiday volume, 1284.
——Outlet box and cover matching, universal key simplifies, *306.
——Plugs and receptacles, standardization of, 498.
——Porcelain shortage slightly relieved, 1044.
——Price guarantee question to be threshed out, 707.
——Price problem an embarrassing one to electrical trade, 900.
——Prices, falling, relation of raw materials, labor and overhead to, 948.
——Prices, trend of, held dependent upon raw material, 756.
——Profits, present-day (comment), 717.
——Ranges, electric, demand exceeding production, 499.
——Readjustment without panic predicted by Archer W. Douglas, 1087.
——Reflector market, uneven conditions in industrial, 403.
——San Francisco, heating appliance and range situation in, 995.
——Schedule material lists, producers divided on raising, 43.
——Schedule material manufacturers busy, 995.
——Shipments, no geographical discrimination in, 356.
——Steel price cuts by independents, further, 1237.
——Steel price not expected to help stabilization, 1138.
——Steel price, raw-pipe quotations only, to remain up, 1284.
——Steel products affected by labor and traffic, supply of, 43.
——Steel towers, foreign demand for, good, 147.
——Tape, friction, increasing supply of, 548.
——Tape, friction, producers see no big price drop before January, 948.
——Tape producers look for good year ahead, 1284.
——Tape, winding, slightly lower in price, 901.
——Tools, linemen's, becoming available, 1093.
——Trade acceptance, greater use strongly urged, 259.
——Trade acceptances, pamphlets on, for distribution, 1236.
——Trade practices on Pacific Coast, Department of Justice investigating, 940.
——Transformer market continues active, 259.
——Transformers, almost no recession in demand for, 947.
——Transformers in good demand. 1236.
——Truck industry, electric, rapidly growing, 1285.
——Warning to association, decision in lumber case sounds, 100.
——Washing machine costs advance in three years, 1285.
——Washing machine motors, progress in standardizing, 948.
——Washing machine manufacturers, uniform guarantee adopted by, 756.
——Washing machine prices still advance, 660.
——Washing machines enter strong buyers' market, 852.
——Wire, bare copper, deliveries impeded by fuel and car shortage, 498.
——Wire, guy, again becoming available, 757.
——Wire market, conditions uneven in bare copper, 44.
——Wire prices show downward trend, 852.
——Wire, standard-steel, market steady under short supply, 100.
——Wiring materials prices, no immediate drop in, seen, 947.
——Wiring, new conduit bodies expected to simplify exposed, *307.
Transformers:
——Auto-, for motor starting. By Theodore Schon, *473.
——Current, for 10,000 to 40,000 amp. By Keinajah (D), 1032.
——Current, ratio and phase angle, errors due to remanent magnetism. By Engelhart (D), 985.
——Phasing auto-, for power-factor measurements. States Co., *264.
——Polarity and phase rotation and voltage diagrams of. By A. Boyajian (D), 294.
——Testing of small, safety first. By A. Heckman (D), 391.
——Valve, automatic safety, for oil-filled. Pittsburgh Transformer Co., *1000.
——Vault ventilation, calculating transformer. By W. W. Parker, *334, comment 319.
Transmission systems:
——Aluminum conductors for transmission lines, use of (D), 791.
——Arcing grounds on high-tension lines. By W. D. A. Peaslee, *424, comment 414.
——Calculation, modern methods for transmission line. By Blondel (D), 1126.
——Circuits, electrical characteristics of transmission. By William Nesbit (D), 32, 536, 1178.
——Circuits, switching and protection of transmission. By S. Q. Hayes (D), 31.
——Constants, three-phase transmission line, as referred to the frequency of the third harmonic. By Swyngedaum (D), 198.
——Corona voltages for actual lines, determining. By T. W. Peek, Jr., *1258.
——Interconnection:
Public aspects of (comment), 1245.
——Distance control in three-phase systems. By Roth (D), 1126.
——Half-wave transmission lines. By Brylinski (D), 31.
